

AWARDS

A celebration of EWI innovation and excellence

WINNERS 2023

External Wall Insulation systems from **Sika** combine high-performance renders and coatings with quality insulation to create attractive, energy-saving facades for new build and refurbishment projects.

VISIT **SIKA.CO.UK/BUILDINGFINISHING** FOR MORE ON SIKA EWI SYSTEMS, OR THE FULL RANGE OF BUILDING FINISHING FAÇADE SOLUTIONS.

BUILDING TRUST

AWARDS

Welcome

The Insulated Render and Claddina **Association (INCA) Awards recognise** innovation and excellence in External Wall Insulation (EWI) projects delivered by members over the last year.

Across all sectors of the industry, all this year's finalists demonstrate the vital role for EWI in improving the energy efficiency of buildings, lifting households out of fuel poverty, and transforming local communities.

INCA is delighted to see the high standard of entries this year and we would like to share them with you in this years' winner's brochure.

Contents

- 4 High Rise EWI Brick Effect Finish

- 26 Judges Choice Special Commendation
- 27 Outstanding Achievement Award
- 29 Component Supplier of the Year
- 31 Installer of the Year

Showcasing the Best in **External Wall** Insulation

The Judges

Andrew Champ

Executive Director at SWIGA for 8 years and a 25+ year tenure at Rockwool. 2022 winner of the INCA Outstanding Achievement Award.

Gary Peacey

Owner of EWI Consultants Limited with over 25 years EWI industry experience with Marmorit, Knauf and Jub. Aids the INCA Technical Committee in the development of technical documentation and expert advice.

Mitch Gee

Independent EWI Consultant and former Chairman of INCA with over 30 years industry experience with SPS Envirowall and Rockwool. Existing Non-Executive Director of the **INCA Board and Welsh Committee** Chairman.

Taryn Davies

Group Sales Director with over 16 years' experience working for a EWI system manufacturer Dryvit. Represented INCA as a Board Director for 4 years.

Hazel Turner

Former INCA Company Secretary, INCA Board Director and owner of an EWI contracting business for over 10 years. In the industry for over 25 years in sales and technical roles at Sto UK and Rockwool Group and Sheffield Insulations.

High Rise EWI - Brick Effect Finish

For new build or refurbishment projects in excess of 11m high and incorporating a full EWI system predominantly finished with brick slips or brick effect. Category sponsor

Building with conscience.

Shortlist

- Campbell House, Bristol Aliva UK
- > Urban Hub Alsecco (UK) Ltd
- > Apple Building Alsecco (UK) Ltd
- > Cluny Mews, London Alsecco (UK) Ltd & Complete Wall Solutions Ltd
- > County Flats Wetherby Building Systems Ltd

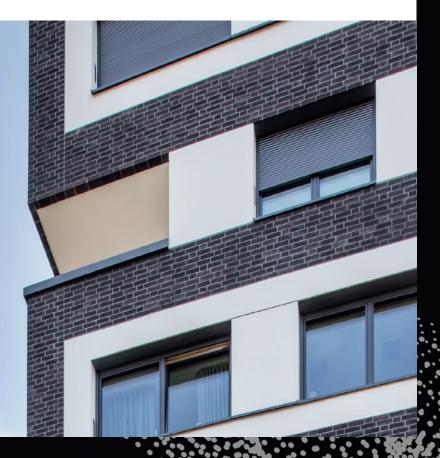

Systematic Design Freedom

Our external wall insulation systems, ventilated rainscreen systems, and wide range of materials have been developed for maximum design freedom to create unique and long-lasting facades.

You decide on the dimensions, shapes, materials, surfaces and colours, so that you can achieve the high-quality aesthetic and effect you're looking for in your project.

Choose an A1 or A2-s1, d0 rated system, and make an impression with reliable system solutions from Sto.

T. 0330 024 2666 www.sto.co.uk

Cluny Mews, Earls Court

"Crisp, sharp lines, chamfered right angles, good use of colour and high u-value performance ... absolutely stunning!"

LICENCEES REQUIRED! ARTBRICK™ SOLUTION

Structherm ArtBrick™ has been used extensively for properties subject to strict planning constraints and where approval has been required by planning authorities. This has enabled properties to be thermally upgraded even in conservation areas, without changing the overall appearance.

Our matching service can be utilised to provide samples for approval replicating brick, stone or wood finishes.

ArtBrick™ is a specialist render finish produced on-site, providing a robust, hard wearing and aesthetically stunning finish.

To become an approved licensed installer of Structherms EWI systems with ArtBrick $^{\text{\tiny{TM}}}$, experienced INCA contractors should contact us now - info@structherm.co.uk - 01484 850098 - structherm.co.uk

Winning Project - New Build

Howgate Close, Nottingham

An incredible showcase for EWI in our industry drive to support sustainable new build construction ...

Q: "How often do you turn on your heating?" A: "Never. The lowest temperature it's been since we've been living here is 19 degrees. And that was mid-winter in the morning

about 7:00 am" Howgate resident.

System Designer:

EWI Pro Insulation Systems Ltd

Judges Choice - Special Commendation

Judges Award for exceptional, stand out projects...

Category sponsor

Winning Project

Selfridges Building, Birmingham

"The quality of design and installation versus the complexity and amount of work undertaken to fulfil the refurbishment of the iconic building is worthy of a special commendation."

Contractor:

Rendserve Ltd

Outstanding Achievement Award

Winner: Kevin Mangan

Category sponsor

Kevin has worked within the EWI industry for 30 years, currently employed as the Technical Manager for Sika's Building Finishings Division. He is also Chairman of the INCA Technical Committee. Kevin joined Rockwool Ltd in 1993 as a Technical Advisor for ETICS, and he has worked for component suppliers, SPS Envirowall/ Benx and for Lawtech Ltd, one of the largest contractors in the industry.

Whilst working for Lawtech Ltd, Kevin helped to shape and deliver one of the first training academes run by a contractor to ensure skill levels remained high on site. Kevin has sat on working groups for many of the standards we all know and use now. The most pressing one being the development of the EN 13501 Fire Classification for Construction Products and Building Elements, where it was established at early stages that systems such as ETICS need to be tested and classified as a complete kit of components as intended for end use application. Kevin has also worked closely with the BBA working group when engaging system designers and industry bodies on wind load.

Over the years Kevin has always strived for improvements within the industry and when championing causes for INCA it is always done in an impartial manner to ensure that no one company has an advantage, this can be seen with the recent work stream on roofline closure systems alongside Andrew Champ and Dr Jeremy Richings.
